Roberta,

When I initially reviewed your comments, I reviewed them thinking they pertained to the Ag RTC. Based on this thinking, I modified the "standard" NOAA/EPA response currently found in the draft RTC for many of our responses to the ag comments. On further review, (after my Monday morning coffee) I realized your comments were on the "findings" document. I am so sorry. I hope I haven't confused things too much.

So, after getting in sinc with your thinking, I made some proposed edits to the "finding"s document. The modified language is attached for your review. I agree with your comments and will share these modifications with the managers tomorrow. If it is possible, please let me know if you agree with these revisions.

Alan
